Many thanks Alasdair

I have made some amendments and attach a revised draft for comment before it goes. I wanted to make it clear that we are instructing him as an independent reviewing pathologist. I have also removed most of the reference to the rib injury in the light of the fact that Prof Freemont is now instructed. In addition I have added Dr Nat Carey's report to the material as I take the view that all reports dealing with the cause and mechanism of death should be reviewed

Regards

Les

Hi Les

Please find attached first draft of letter to Dr Lawler. Feel free to amend as necessary.

Similar to Prof Freemont I'll have all the materials put on an encrypted disc and have couriered to Dr Lawler once happy with letter.

Cheers

Alasdair
