I agree . In any event his histological analysis of the heart muscle is at odds with the rest of the experts and calls into question his reliability on other matters .

Many thanks Ashley

I have copied others into the chain here. I agree that we should review the finalised document.

I suggest that we remove all reference to Dr Karch on the basis that the previous LA indicated to Amer Anwar that we would not be relying on him following his comments to a newspaper.

I respect of the officer down comment I suggest that we simply state that there is uncertainty at this time as to whom that comment relates

Regards

Les

Dear all ,

Mindful that this letter of instruction will become disclosable and ultimately form part of the full evidence of the expert I have changed some of the language . Fiona , once you see the tracked changes if you agree and accept then we should have another look at how it reads as it is a bit difficult to double check with all the tracks .

In the bit about the pm I conclusion I think we should add the quote from the PM repeated at page 130 vol 1 of the PIRC . I think that is a nice clear summary .
I think all the important Q about restraint are spot on .

Subject: bayoh - draft letter to OST expert

Hello all,

I agreed with Alasdair that I would have a go at revising his draft letter of instruction. I have tracked changes.

The approach I have taken is to provide some background on cause of death and events earlier on 3/5/15. Then to try to explain, in a logical order, the relevant materials.

[Alasdair, I am not sure if we are sending the composite disc with password to be emailed separately or if you can get the content of that onto an encrypted pen- drive?]

I thought I would send this draft meantime so that the essential information provided and questions posed can be considered and revised.

I am not sure about what we have and what we might get from PIRC in the way of training records. Can you help me with what we have at the moment, Alasdair?

Separately, per discussions, we do seem to have (pros 297, 567, 568,) copies of the police intelligence held on Bayoh.
